

# Microperf Acoustical Board

Madrid Microperf Acoustical Board combines exceptional sound absorption properties with the rich and warm aesthetic of real wood veneer. Madrid Microperf Acoustical Board can be used on walls and ceilings in a variety of applications including schools, hospitality, restaurants, office space, theaters, gymnasiums, mixed-use spaces or any environment where acoustic control is desired.

A non-perforated option is also available for perimeter panels or areas where they are not preferred.

## Specifications:

- Weight: Approximately 1.6 pounds per square foot
- Core: Lightweight honeycomb core made from “post-consumer” recycled cellulose backed with an acoustical fleece, in a rigid perimeter frame. MDF reinforced panels available for areas where cut outs are needed.
- Perimeter frame available in 1" or 2"
- NRC rating: 0.75-0.85 NRC
- Fire rating: Class-A
- Typical mounting methods: z-clips, “push in” fittings, panel claws, tongue and groove with screws

Microperf Acoustical Board provides excellent acoustical performance and is ideal for a variety of applications.

### About Madrid

Madrid has been crafting unique curved wood products since 1977. We began as an innovator in the skateboard industry and have manufactured wood elements for the furniture trade for over 30 years. Today, Madrid is a leading manufacturer of wood architectural products. In addition to acoustical wood products, Madrid manufactures curved wood custom plywood sheets, wood ceiling tiles and woven wood products. Contact Madrid or your local representative for more information.
